

Shreya Rajput

I am a person who looks for growth and opportunities in all spheres. My objective is to pursue a demanding career in the field of technical engineering. With all the skills that I possess and the achievements that I have accomplished over the past years. I consider myself favorable enough for adding optimum value to the concerned department that I join my hands with.

SKILLS

- ReactJS
- HTML5
- CSS
- Bootstrap
- JavaScript
- Redux
- OOPS
- C++
- Organizational skills

PROJECTS

COVID-19 —

I have created a COVID-19 Tracker application with the help of ReactJS. Unfortunately, Corona Virus is spreading throughout the entire world. This project is going to fetch the live data from the API using Async/Await syntax. I have also used React Hooks, Material UI for this project. Along the way, I have learned how to build charts using react preferably.

General Knowledge QUIZ App—

This quiz app is built using ReactJS. In this project, there are fifty questions mostly related to general knowledge. Each question has three options and also you get 10 sec for each question. In the end, it will show the final score out of fifty.

Multiple Step Form Application —

In this project, I have built a React multi-step form with multiple components including user & personal details, confirmation, and success. Also, I have used material UI in this project.
